GREETINGS FOR 1961

Another year and we send our best wishes to all iris lovers. We have had many iris in bloom this past fall and winter. I'll mention it in the description of these iris so perhaps others of you who have mild winters will want to try some and hope for this extra bloom. Since Nov. 1st, 29 different varieties have been in bloom off and on. Today, Feb. 8th, 24 of them are blooming and I notice quite a few more just starting to send up their bloom stalks. "Bride", a dwarf, is blooming now, prolific in increase and bloom, and a lovely border. So it looks like we may have iris from now on, unless we have another cold spell like we did early in Dec. which froze the blossoms out at that time.

We extend an invitation to all to visit us, especially at the main iris blooming season, April and May, with our peak bloom about May 1st.

Valley Center is in San Diego County in Southern California, 9 miles N.E. of Escondido on the road to the famous Palomar Observatory, which is 21 miles from here. We are on the main road, look for our sign and drive in. Our new fields are about 2 blocks back from the highway. Garden Club groups are especially welcome but we would appreciate knowing in advance when you would like to come.

Our new fields are smaller but our increase has been tremendous. We wish to pass this bounty on to you in lower prices, most are from a third to a half or more less than the regular price.

Parcel Post rates keep going up but we will still pay the postage on all orders of \$5.00 or more. On smaller orders please add 50¢ to help with the expense of packing and postage.

We wish to thank all our customers for their splendid orders and nice letters of appreciation. Wish we could answer each one personally, but time forbids. We hope also to be able to serve you again this year. To prospective new customers, take advantage of these low prices and try some of our iris. Only the price is reduced, not the quality. Satisfaction is guaranteed.

Sincerely yours,

Mrs. Frances J. Lawson

TERMS OF SALE

CASH with order, check, draft or money order. California residents please add 4% sales tax.

No C.O.D. shipment please, as it means more work for us and more expense for you.

POSTAGE PAID on orders in U.S.A. of \$5.00 or more. On smaller orders add 50¢ to help with the expense of packing and postage.

SPECIAL POSTAGE OFFER—If your order amounts to \$5.00 or more, and if you include \$1.00 toward postage and packing, we will send you an extra iris, of our choice, listed at \$2.00 or more.

SHIPPING starts July 1st and orders will be shipped in rotation as received unless special shipping date is required. We appreciate your telling us the best time to ship to your location. We can ship in the spring if necessary. In most of Texas and other warm dry locations, Sept. and Oct. are good planting months. So, advise us if you wish them held for late shipping.

GUARANTEE—We have a "Pinto Tag", the highest form of State inspection. Our iris are disease free, hardy and top quality. They are guaranteed true to name and to grow for you. However, we are not responsible for winter kill.

FREE GIFT—We want to be generous so will include a free gift iris with all orders, even at these low prices.

SPECIAL BONUS—On all orders postmarked before June 1, 1961, we will send an extra bonus iris. So get your order in early, win the extra free iris and avoid the possibility of our being sold out, as some varieties are in short supply. Please list several extra varieties which we may substitute if necessary or choose your gift from if stock permits, as we would rather send you something we know you don't have and would like.

WHOLESALE—We may not send out a Wholesale List this year, so send a list of your needs and we will quote prices if stock is available.

MINIATURE IRIS

Dwarf, Intermediate, Table and Border

We find a growing interest in these shorter and smaller editions of the tall bearded varieties. The shorter bloom stalks are useful in the rock garden and for border plantings. The smaller blossoms are ideal in arrangements. Most of the rhizomes are small but prolific with increase. Heights range from 11" to 28".

IRIS CULTURE

Iris are easy to plant and require a minimum of care. They will do well in almost any sunny, well drained spot. Spread the roots and plant so the rhizome is just barely covered with soil. The soil should be kept moist until the plant is well established, then will withstand drought and neglect, but respond bountifully to proper care and culture. Bone meal may be worked into the soil before planting, a small handful to each plant, or used as a side dressing once a year. Be careful if you use fertilizers, not to let it come in contact with the rhizome, as it may cause rot. Since Iris multiply rapidly, planting should be spaced from 12 to 18 inches apart to allow for proper ventilation. Divide them about every three years for best results.
